

This is a useful reminder from Cheshire West & Chester Council for you to share with your contacts and post on your websites:

Please wash your hands both before and after touching your bins and recycling containers.

This is to reduce the spread of Coronavirus.

Remember to please wash your hands thoroughly - for at least 20 seconds using your normal soap – both before and after touching your bins and recycling containers – including once they've been emptied.

By doing so, we will ALL help reduce the spread of COVID 19 in our area.
